We can handle all of your refueling needs!

On site we have underground fuel storage with 10,000 gallons of Jet-A storage and 10,000 gallons of 100LL storage which are both accessible from an outside QT Technologies credit card terminal for your 24 hour self serve fueling needs. We also have a Jet-A fuel truck for ramp refueling.

What about maintenance?

We are equipped to perform extensive maintenance on ag aircraft and general aviation aircraft with our 100' x 70' heated maintenance facility. We have the ability of a level III NDT service from Indianapolis that is certified to inspect the lower wing spar caps for both the AirTractor and Thrush aircraft at our facility.
